Physical Activity and Disease Prevention: Identifying Research Priorities

December 13-14, 2012

David M. Murray, Ph.D.
Associate Director for Prevention
Director, Office of Disease Prevention
National Institutes of Health
The mission of ODP is to work with the NIH Institutes and Centers (ICs) and other partners to provide leadership for the development, coordination, and implementation of activities to increase the scope, support, public health impact, and dissemination of health promotion and disease prevention research supported by NIH.
NIH will support activities across all phases of health promotion and disease prevention research.

NIH will support health promotion and disease prevention interventions that are based on the best available evidence and will evaluate those interventions using the strongest and most appropriate methods.

NIH will foster adoption of evidence-based health promotion and disease prevention interventions to improve public health in the nation and throughout the world.

NIH will develop methods that facilitate the analysis of its health promotion and disease prevention research portfolio.
NIH will employ review, award, and monitoring procedures that support health promotion and disease prevention research.

NIH will support collaborations across the NIH and with other public and private partners for the development and support of new health promotion and disease prevention research.

NIH will provide state-of-the-art training in the design of health promotion and disease prevention interventions and in the design and analysis of studies to ascertain their effects.

NIH will be viewed by public and private entities as a trusted source for information regarding health promotion and disease prevention research.
First strategic planning effort by the Office
Will involve many stakeholder groups
- IC Directors
- Division Directors, Branch Chiefs, Program Directors
- Review Staff
- Other Federal Partners
- Extramural Community
- Professional Societies
- General Public
Goal - to develop roadmap for the next 5 years
Why Physical Activity?

- Related to mission and vision of ODP
  - NIH will support collaborations across the NIH and with other public and private partners for the development and support of new health promotion and disease prevention research
- Linked to many chronic diseases and conditions
- Large potential public health impact
- Large evidence-base
- Guidelines aren't being followed
Goal and Objectives of the Workshop

- To identify new research ideas and partnerships in physical activity and disease prevention that will help advance the science for designing successful public health programs
  - Review the barriers to achieving the physical activity guidelines
  - Describe what works
  - Identify the antecedent conditions and research priorities to move the state-of-the-science forward
Summary of workshop including research recommendations, partnerships and collaborations.

Recommendations for research program announcements.

Recommendations for future workshops.
Thanks and Appreciation

- Co-Chairs, Russ Pate and Rick Troiano
- Planning Committee – noted on participant list and Planning Committee Co-Chairs, Margaret McDowell and Barry Portnoy
- Federal Partners – CDC, AHRQ and ODPHP
- Speakers and Academic Partners
- IQ Solutions – Danielle Voss, Lisa Jorde, Kim Holmes
- ODP program staff – Wanda Davis, Susanne Olkkala, Jessica Wu
