Tobacco Regulatory Science Program (TRSP) Background

- Emerged as a result of a partnership between FDA's Center for Tobacco Products (CTP) and NIH
- Has NIH oversight responsibility for trans-NIH activities with CTP (FOAs, grantee mtgs., etc.)
- TRSP represents an addition to the NIH tobacco research program and does not replace or diminish any existing tobacco research activities at any of the Institutes or Centers.

Tobacco Regulatory Science Program

The Tobacco Regulatory Science Program (TRSP) is an interagency partnership between the NIH and the **FDA Center for Tobacco Products** to foster tobacco regulatory research.

With the passage of the 2009 Family Smoking Prevention and Tobacco Control Act (Tobacco Control Act), the FDA acquired the authority to regulate the manufacture, marketing, and distribution of tobacco products in order to protect public health. Within the framework of the Tobacco Control Act, the NIH and FDA formed this partnership to establish a comprehensive research agenda in tobacco regulatory science.
